Professional Summary

Computer Science student at UET Lahore (CGPA 3.67/4.0) with a strong foundation in Object-Oriented Programming, Data Structures, Algorithms, and Database Management, and hands-on experience building production Ruby on Rails applications. Comfortable across the full stack with Rails, PostgreSQL/MySQL, RESTful API design, SQL, and modern JavaScript/React, with practical experience using Git, code reviews, and agile methodologies. Built and deployed multiple Rails projects (POS system, AI grading platform, ticket tracking system) and a live MERN e-commerce platform serving real customers. Quick learner, strong problem-solver, and comfortable working in collaborative, fast-paced engineering teams.

Technical Skills

- **Core CS:** Object-Oriented Programming, Data Structures, Algorithms, Database Management, SQL
- **Backend:** Ruby on Rails, Node.js, Express.js, RESTful API Design, MVC Architecture, Devise, Pundit, JWT & OAuth
- **Frontend:** React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
- **Databases:** PostgreSQL, MongoDB, MySQL, SQLite, Firebase/Firestore
- **Tools & Version Control:** Git/GitHub, Postman, RSpec, Capybara, Agile/Scrum, Jira
- **DevOps:** Docker, Heroku, Railway, Nginx, Ubuntu Server (self-hosted), Cloudflare Tunnels

Professional Experience

Software Engineering Intern — CribbleTech

May 2025 – Aug 2025

Lahore, Pakistan

- Built and shipped production features as part of a professional engineering team, gaining hands-on exposure to real-world codebases, Agile workflows, and client delivery cycles.
- Designed and developed RESTful APIs backed by PostgreSQL, including schema design and query optimization.
- Built responsive frontend interfaces with Tailwind CSS, integrated tightly with backend API endpoints.
- Implemented secure authentication using JWT and OAuth, with session handling and role-based access control.
- Performed API testing in Postman and applied performance optimizations that reduced average response times.

Freelance Full-Stack Developer — Fiverr & Upwork

Sep 2024 – Jun 2025

Remote – International Clients

- Delivered custom software solutions for international clients, including console applications, management systems, data tools, and algorithm projects in C++, C#, and Python.
- Built complete web applications end-to-end, from requirements gathering through production deployment.
- Maintained clean Git workflows, wrote technical documentation, and communicated progress using Agile practices.

Technical Lead — Group Projects, UET Lahore

Jan 2024 – Present

- Led cross-functional student teams across multiple CS projects and inter-university events.
- Architected and deployed a QR-based event entry system used live by 614 students with zero failures at CS Riwayat 2k26.
- Received an appreciation shield and certificate from the UET CS Department for outstanding project execution.

Projects

CloudKartPOS — SaaS Point of Sale System

Ruby on Rails, PostgreSQL

github.com/HamzaAhmad-098/CloudKartPOS

- Built a cloud-ready Rails POS system for retail shops, pharmacies, and cafes with inventory management, billing, and barcode support.
- Designed multi-business configuration with a responsive UI, structured for portable cloud deployment.

TeacherHelperApp — AI-Powered Grading SaaS

Ruby on Rails, PostgreSQL, LLM API

Live Site github.com/HamzaAhmad-098/RubyOnRails

- Developed an AI-powered grading system that auto-evaluates student tests using an LLM API through a Rails MVC backend.
- Implemented full Devise/Pundit authentication with role-based access control.
- Self-hosted on a home-built Ubuntu server with Cloudflare Tunnel and a custom domain, live 24/7.

DevBoard — Project Management SaaS (Jira-style)

Ruby on Rails 7, PostgreSQL

github.com/HamzaAhmad-098/DevBoard

- Built a Jira-inspired ticket tracking system with authentication, role-based authorization, ticket workflows, comment threads, and full ticket history.
- Optimized PostgreSQL queries and migrations for performance at scale.

M.BeautyBloom — Live E-Commerce Platform

MongoDB, Express.js, React, Node.js, Redux Toolkit

mbeautybloom.shop [GitHub](#)

- Built a full-stack MERN e-commerce store for premium cosmetics, deployed on a custom domain and serving real customers.
- Implemented JWT authentication, real-time order tracking, an admin dashboard, and a Cloudinary image pipeline with a mobile-first responsive design.

SecureEntry — QR Event Access System

Firebase, Firestore, Python, HMAC

welcome-25.web.app github.com/HamzaAhmad-098/secure-entry-qr-system

- Built a production, real-time event entry system for UET's CS Riwayat 2026, serving 614 students with zero downtime.
- Implemented HMAC-secured QR token generation, a real-time scanner UI, live attendance dashboard, and automated email delivery with bounce detection.

EventSphere — Event Management System

C#, .NET 8, WinForms, MySQL

github.com/HamzaAhmad-098/EventSphere

- Built a complete event management system with finance tracking, role-based access control, committee assignments, and automated PDF reporting.
- Designed for university-scale event operations.

Education

Bachelor of Science in Computer Science — University of Engineering & Technology (UET) Lahore
2024 – 2028

CGPA: 3.74 / 4.0 — Honhar Scholarship Recipient

Relevant Coursework: Software Engineering, Database Systems, Web Development, Cloud Computing, OOP
