PROFESSIONAL SUMMARY

Full-Stack Developer and CS student at **UET Lahore** (CGPA 3.67/4.0) with **2+ years** of experience building and shipping production-ready web applications and SaaS platforms. Proficient in **JavaScript, TypeScript, React, Node.js, Ruby on Rails**, and RESTful API design, with a strong foundation in relational and non-relational databases (PostgreSQL, MongoDB, Firebase). Self-hosts real projects on Ubuntu Server with Cloudflare tunnels. Architected a live **QR-based event entry system used by 614 students** with zero downtime earning an appreciation shield from UET's CS Department. Adaptable, fast-learning, and delivery-focused.

TECHNICAL SKILLS

Languages	C++, C#, Python, Ruby, JavaScript (ES6+), TypeScript, HTML5/CSS3
Frontend	React.js, Redux Toolkit, Next.js, Tailwind CSS, Bootstrap, Vite
Backend	Ruby on Rails, Node.js, Express.js, RESTful API Design, MVC Architecture, JWT & OAuth
Databases	PostgreSQL, MongoDB, MySQL, SQLite, Firebase/Firestore, Supabase
DevOps	Ubuntu Server (self-hosted), Cloudflare Tunnels, Docker, Heroku, Railway, Nginx, SSH
Integrations	Stripe, Cloudinary, Brevo/SMTP, Socket.io, HMAC Security, QR Codes, Excel Parsing
Tools	Git/GitHub, Postman, Jira, VS Code, Agile/Scrum, RSpec, Capybara, Arduino/IoT

PROFESSIONAL EXPERIENCE

Software Engineering Intern · CribbleTech

May 2025 – Aug 2025

Lahore, Pakistan

- Built and shipped production-grade features within a professional engineering team, gaining deep exposure to real-world codebases, agile workflows, and client delivery cycles.
- Designed and developed scalable RESTful APIs backed by PostgreSQL with comprehensive schema design and query optimisation.
- Built responsive frontend interfaces using Tailwind CSS, integrated tightly with backend API endpoints.
- Implemented secure authentication flows using JWT and OAuth; managed session handling and role-based access control.
- Conducted API testing via Postman and applied performance optimisations reducing average response times.

Freelance Full-Stack Developer · Fiverr & Upwork

Sep 2024 – Jun 2025

Remote – International Clients

- Delivered custom software solutions for international clients: console games, management systems, data tools, and algorithm projects in C++, C#, and Python.
- Built complete web applications end-to-end – from requirements gathering through production deployment.
- Maintained clean Git workflows, wrote technical documentation, and communicated progress using Agile practices.

Technical Lead – Group Projects · University of Engineering & Technology (UET)

Jan 2024 – Present

Lahore, Pakistan

- Led cross-functional student teams across multiple CS projects at UET and inter-university events.
- Architected and deployed a full QR-based event entry system used live by **614 students with zero failures** at CS Riwayat 2k26.
- Received **appreciation shield & certificate** from the UET CS Department on stage for outstanding project execution.

Tech Tutor · Self-employed

May 2024 – Present

Lahore & Kasur, Pakistan (Online + Physical)

- Teaching CS, Mathematics, and programming to students across Pakistan.
- Specialised in SSC/HSSC preparation and university entry tests (ECAT/NUST) for top-ranked institutions.

PROJECTS

SecureEntry — QR Event Access System ★ [Featured](#) · [Production](#)

[Firebase](#) · [Firestore](#) · [Python](#) · [HMAC](#) · [Brevo/SMTP](#) ·

[HTML/CSS/JS](#)

[welcome-25.web.app](#) [GitHub](#) 614 users · Zero downtime · Award received

- Production-grade, real-time event entry system for UET's CS Riwayat 2026 serving 614 students.
- Admin panel with bulk Excel → Firestore upload (499 records/batch), HMAC-secured QR token generation, and automated email delivery via Brevo/SMTP.
- Real-time scanner UI, live attendance dashboard, bounce detection with WhatsApp fallback, and duplicate-entry prevention.
- Deployed with zero downtime on event day; received appreciation shield from UET CS Department on stage.

M.BeautyBloom — Live E-Commerce Platform

[MongoDB](#) · [Express.js](#) · [React](#) · [Node.js](#) · [Redux Toolkit](#) · [Cloudinary](#) · [JWT](#)

[mbeautybloom.shop](#) [GitHub](#) Live in Production

- Full-stack MERN e-commerce store for premium cosmetics deployed on a custom domain, serving real customers.
- JWT authentication, real-time order tracking, admin dashboard, Cloudinary image pipeline, and mobile-first responsive design.
- Three-tier architecture with security hardening at every layer; complete product, cart, and order management.

CloudKartPOS — SaaS Point of Sale System

[Ruby on Rails](#) · [PostgreSQL](#) · [Barcode](#) · [Inventory Management](#)

[GitHub](#)

- Modern cloud-ready POS system for retail shops, pharmacies, and cafés with inventory management, billing, and barcode support.
- Multi-business configuration and responsive UI; designed for portable cloud deployment.

TeacherHelperApp — AI-Powered Grading SaaS

[Ruby on Rails](#) · [AI/LLM API](#) · [PostgreSQL](#) · [Ubuntu Server](#) · [Cloudflare](#) ·

[Devise/Pundit](#)

[Live Site](#) [GitHub](#)

- AI-powered grading system that auto-evaluates student tests using an LLM API via a Rails MVC backend.
- Self-hosted on a home-built Ubuntu server with Cloudflare tunnel and custom domain — live and accessible 24/7.
- Full Devise/Pundit authentication with role-based access control.

DevBoard — Project Management SaaS (Jira-like)

[Ruby on Rails 7](#) · [PostgreSQL](#) · [RBAC](#) · [Devise](#)

[GitHub](#)

- Jira-inspired ticket tracking system with full authentication, role-based authorisation, ticket workflows, comment threads, and complete ticket history.
- Optimised PostgreSQL queries and migrations for performance at scale.

EventSphere — Event Management System

[C#](#) · [.NET 8](#) · [WinForms](#) · [MySQL](#) · [PDF Reports](#) · [RBAC](#)

[GitHub](#)

- Complete event management system with finance tracking, role-based access control, committee assignments, and automated PDF reporting.
- Designed for university-scale event operations.

Ludo Online — Real-Time Multiplayer Game

[React](#) · [Vite](#) · [Node.js](#) · [Socket.io](#) · [Tailwind CSS](#)

[GitHub](#)

- Real-time multiplayer Ludo game with Socket.io rooms, color-restricted player routing, and live game-state synchronisation across multiple devices.

EDUCATION

Bachelor of Science in Computer Science · [University of Engineering & Technology Lahore](#)

2024 – 2028

[Lahore, Pakistan](#)

CGPA: 3.67 / 4.0 · **Honhar Scholarship Recipient**

Relevant Coursework: Software Engineering, Database Systems, Web Development, Cloud Computing, OOP
