Professional Summary

Full-Stack Developer with 2+ years of experience building and shipping production-ready web applications and SaaS platforms. Proficient in **JavaScript, TypeScript, React, Next.js, Node.js, Express.js**, and RESTful API design, with a strong foundation in both relational and non-relational databases (PostgreSQL, MongoDB). Proven ability to integrate third-party services including payment gateways, OAuth providers, and cloud APIs. Comfortable picking up new tools and frameworks mid-project adaptable, fast-learning, and delivery-focused.

Technical Skills

Frontend	React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3, Bootstrap
Backend	Node.js, Express.js, RESTful API design, MVC architecture, JWT & OAuth authentication
Databases	PostgreSQL, MongoDB, MySQL, Supabase, ActiveRecord, schema design & migrations
Cloud & DevOps	Docker, Heroku, Railway, Ubuntu server, Cloudflare, CI/CD pipelines
Integrations	third-party APIs, CMS platforms, Stripe, Postman
Tools	Git/GitHub, VS Code, Jira, Slack, Agile/Scrum, RSpec, Capybara

Professional Experience

Full Stack Developer (Ruby on Rails) · Cribble Tech

Jun 2025 – Sep 2025

Lahore, Pakistan (Remote)

- Designed and developed scalable RESTful APIs backed by PostgreSQL with comprehensive schema design and query optimisation.
- Built responsive frontend interfaces using Tailwind CSS, integrated tightly with backend API endpoints.
- Implemented secure authentication flows using JWT and OAuth; managed session handling and access control.
- Conducted API testing via Postman and applied performance optimisations reducing average response times.

Full Stack Developer · Fiverr (Freelance)

Aug 2024 – May 2025

Remote — International Clients

- Delivered 4+ complete web applications — from requirements gathering through production deployment — for international clients.
- Built full SaaS solutions integrating third-party APIs, payment gateways, and cloud storage services.
- Maintained clean Git workflows, wrote technical documentation, and communicated progress using Agile practices.
- Implemented responsive UI designs with Tailwind CSS and Bootstrap across all projects.

Teaching Assistant — Programming · University of Engineering & Technology

Jan 2024 – May 2024

Lahore, Pakistan

- Mentored 50+ students in Object-Oriented Programming and Web Development across 15+ lab sessions.
- Developed technical documentation and guided students toward clean code and software architecture principles.

Projects

M.BeautyBloom — Live E-Commerce Platform (MERN Stack)

React · Node.js · Express.js · MongoDB ·

Tailwind CSS

mbeautybloom.shop (Live in Production)

- Full-featured MERN stack e-commerce store deployed on a custom domain — live and serving real customers.
- Built a React frontend with Tailwind CSS, connected to an Express.js REST API and MongoDB Atlas cloud database.
- Integrated third-party services including cloud storage, authentication, and payment flow.

- Implemented three-tier architecture with security measures at every layer; full product, cart, and order management.

CloudKartPOS — SaaS Point of Sale System

Node.js · PostgreSQL · Docker · JavaScript

[GitHub](#)

- Cloud-ready SaaS POS system with product/inventory management, barcode billing, role-based access control, and sales reporting.
- Responsive frontend with Docker containerisation for portable cloud deployment.

TeacherHelperApp — Educational SaaS Platform

PostgreSQL · Docker · Cloudflare · Tailwind CSS

[GitHub](#)

- Full-featured MVC SaaS application with Devise/Pundit authentication, hosted on Ubuntu server behind Cloudflare.
- Dockerised production deployment with security hardening and role-based access.

DevBoard — Project Management SaaS (Jira-like)

PostgreSQL · REST API · RBAC

[GitHub](#)

- Bug and issue tracking system with secure role-based access control, full CRUD operations, audit logging, and team collaboration.
- Optimised PostgreSQL queries and migrations for performance at scale.

Education

Bachelor of Science in Computer Science · *University of Engineering & Technology Lahore*

2024 – 2028

Lahore, Pakistan

CGPA: 3.65 / 4.0 Relevant Coursework: Software Engineering, Database Systems, Web Development, Cloud Computing

Challenging Integration Cover Note

*The most complex integration I built was in **M.BeautyBloom**: connecting a React/Express.js frontend-backend pair to MongoDB Atlas while simultaneously wiring up third-party processing, OAuth-based authentication, and cloud asset delivery — all in a three-tier production architecture. The challenge was ensuring data consistency across async flows and securing each layer independently. I solved it by designing a clean API contract first, then building inward, with environment-specific configurations and end-to-end testing at each layer before going live on a custom domain.*
